

## THE JOURNAL OF HORTICULTURAL SCIENCE VOL. 60, 1985

## SUBJECT INDEX

- Acids, organic, in orange juice, 563
- Actinidia chinensis* see Kiwi
- Aculus schlechtendali*, apple, 459
- Apple, clones, variation, Cox's Orange Pippin, 297
  - composition, cultivars compared, 291
    - fertilizers affect, 37
    - sward affects, 37
  - cultivars, Discovery, 207, 305
    - compared, 291
    - Cox's Orange Pippin, 25, 37, 169, 201, 291, 297
    - Golden Delicious, 7, 13, 25, 169
    - Goldspur, 141
    - Granny Smith, 181
    - Greensleeves, 169
    - James Grieve, 169
    - Jonagold, 291
    - Michelin, 455
    - Redspur, 141
    - Rome Beauty, 29
    - Sturmer Pippin, 1
  - diseases, powdery mildew, 29
  - dwarf, *in vitro* propagation, 141
  - growth, fungicides affect, 29
    - micropropagation, 169
  - growth regulators, growth, 455
    - lateral branch induction, 447
    - propagation, cuttings, 161
    - quality, marketing, 305
    - thinning, 13, 21
  - harvest date, cultivars compared, 291
  - honey-bee activity, 25
  - irrigation, growth, quality, 181
  - leaf characters, fungicides affect, 29
  - marketing, growth regulators, 305
  - micropropagation, 169
  - nutrition, carbon, propagation, 285
    - NPK, 37
  - orchards, establishment, 169
    - grass control, 455
  - pests, *Aculus schlechtendali*, 459
    - Blastobasis decolorella*, 33
    - Panonychus ulmi*, 459
  - pollination, honey-bee, 25
  - precocity, micropropagation, 169
  - propagation, cuttings, growth regulators, 161
    - carbon nutrition, 285
    - stockplant pruning, 145
    - stockplant, stem blanching, 145
    - summer cuttings, 145
  - quality, clones compared, 297
    - cultivars compared, 291
    - growth regulators, 305
    - irrigation, 181
    - storage, 201
  - rootstocks, Ottawa 3, 285
    - semi-dwarfing, 7
    - trials, 7
  - skin, mutations, 1
  - storage, clones compared, 297
    - CO<sub>2</sub> removal, 201
    - cultivars compared, 291
    - short-term, 207
  - sward treatment, 37

- thinning, growth regulators, 13, 21
  - shade, photosynthesis, 465
  - temperature effects, 21
  - variation, clones, storage, quality, 297
  - yield, fungicides affect, 29
- Australia, orange, selection, 123
- Avocado, container ventilation, 545
  - cultivars, Feurte, 545
  - enzyme activity, 545
  - water stress, 545
- Banana, cultivars, Robusta, 549
  - post-harvest treatments, 549
  - quality, 549
  - shelf-life, 549
- Betula*, seedling, survival, growth, 377
- Blastobasis decolorella*, apple, 33
- Breeding, broccoli, 325
  - muskmelons, 335
- Broccoli, breeding, 325
  - cultivars compared, 325
  - planting, density, yield, 57
  - time, yield, 57
  - yield, planting methods, 57
- Carbon, nutrition, apple, propagation, 285
- Carbon dioxide, enrichment, chrysanthemum, effects, 389
  - enrichment, cucumber, 507
  - removal, apple, storage, 201
- Cabbage, cultivars, Langedijk 3 Decema, 223
  - cultivars, Little Rock, 223
  - disorders, pepper spot, 223
  - harvest date, seed yield, 65
  - nutrition, pepper spot, 223
  - seed, drying, yield, 65
    - performance, management, 65
    - position, seed yield, 65
    - yield, management, 65
    - soil pH, pepper spot, 223
- Carrot, flowering time, seedling size, 77
  - seedling size, flowering time, 77
  - size, variability, 77
- Calcium, tangerine, creasing, 137
- Centaurea junoniana*, propagation, *in vitro*, 93
- Cherry, cultivars, Colt, 439
  - cultivars, F12/1, 439
  - propagation, composition, 311
    - cuttings, 439
    - grafting, compatibility, 311
    - union formation, 311
- Chrysanthemum, carbon dioxide enrichment, 389
  - flowering, light, CO<sub>2</sub>, 389
  - growth, light, CO<sub>2</sub>, 389
  - nutritional status, light, CO<sub>2</sub>, 389
  - supplementary lighting, 389
- Climate, onion, growth components, 341
- Composition, pistachio, salinity, iron, 115
- Corchorus olitorius* see Jute
- Cordylone terminalis*, growth, 525
  - propagation, *in vitro*, 525
- Cucumber, CO<sub>2</sub> enrichment, 507
  - growth, yield, CO<sub>2</sub>, 507
- Cuttings, apple, plum, growth regulators, 161
  - summer, 145
  - plum, growth regulators, 153
  - Prosopis alba*, environment, 275
- Cyclamen, propagation, *in vitro*, 397
- Dessication, affects seedling survival, 377

- Enzyme activity, banana, 545
- Establishment, *in vitro*, gooseberry, 215
  - orchard, apple, 169
- Fertilizers, apple, NPK, 37
- Flowering, chrysanthemum, light, CO<sub>2</sub>, 389
  - synchrony, pistachio, 107
- Fraxinus*, seedling, survival, growth, 377
- Fungicides, apple, growth, 29
  - apple, leaf characters, 29
  - powdery mildew, 29
  - compounds, benomyl, 29
  - etaconazole, 29
  - lettuce, composition, 245
- Germination, tomato, growth regulators, 353
- Gooseberry, cultivars, Careless, 215, 485
  - cultivars, Invicta, 215, 485
  - establishment, 215, 485
  - micropropagation, 215
  - propagation, *in vitro*, 485
- Grafting, cherry, union formation, 311
- Grapevine, growth, light effects, 473
  - reproduction, light effects, 473
- Growth, apple, irrigation, 181
  - apple, micropropagation, 169
  - components, onion, climate, 341
  - lettuce, nutrition, 233
- Growth regulators, apple, growth, 455
  - apple, lateral branch induction, 447
    - propagation, 161
    - quality, 305
    - storage, 207
    - thinning, 13, 21
  - compounds, ancymidol, 263
    - 6-benzylamino purine, 447
    - cytokinin, 447
    - 2, 4-D, 353
    - daminozide, 353
    - ethephon, 13, 21, 207, 305
    - gibberellic acid, 447
    - glyphosate, 353
    - IBA, 153, 161
    - paclobutrazol, 192, 353, 455, 501
    - n-propyl-3-t-butylphenoxycetate, 447
  - application methods, 263
  - lily, application, growth, 263
  - plum, fruit thinning, 193
    - propagation, 153, 161
  - strawberry, growth, yield, 501
  - tomato, germination, 353
    - growth, 353
- Harvesting, apples, date, cultivars compared, 291
- Herbicides, lettuce, composition, 245
- Honey-bees, apple, pollination, 25
- Hybridization, artificial, pistachio, 107
- Iron, pistachio, growth, composition, 115
- Irrigation, apple, growth, quality, 181
- Isoelectrofocussing, composition, cherry, 311
- Jute, morphotype diversity, 557
  - vegetable, Nigerian races, 557
- Kiwi, growth, light effects, 473
  - growth, nutrient deficiencies, 411
  - nutrition, growth, 411
  - reproduction, light effects, 473

- Lettuce, composition, herbicides, fungicides affect, 245
  - composition, carotenes, 245
    - xanthophylls, 245
  - growth, nutrition, 233
  - nutrition, growth, 233
- Light effects, kiwi, growth, reproduction, 473
  - grapevine, growth, reproduction, 473
- Lily, cultivars, Mid-Century Hybrid, 263
  - growth, growth regulators, 263
  - growth regulators, application methods, 263
- Malate, rhubarb, composition, 257
- Meteorological data, onion, growth, 341
- Micropropagation, apple, 169
  - gooseberry, 215
  - rhododendron, hybrids, 269
- Muskmelons, breeding, 335
  - concentrated-yield, breeding, 335
  - cultivars compared, 335
- Mutations, apple, skin, 1
- Narcissus, bulbil yield, 531
  - propagation, twin-scaling, 531
- Nematodes, virus transmission, raspberry, 319
- New Zealand, apple, rootstocks, 7
- Nutrition, carbon, apple, propagation, 285
  - lettuce, growth, 233
  - tomato, seed, yield, quality, 373
- Onion, composition, plant density, 83
  - growth, components, climate, 341
  - hybrid, seed production, 251
  - pickling, quality, factors affecting, 83
  - planting, density, yield, quality, 83
  - yield, plant density, 83
- Orange, composition, juice, organic acids, 563
  - cultivars, selection trials, 123
    - Shamouti, 563
    - Valencia, 123
  - nucellar and old-line compared, 563
- Organogenesis, *in vitro*, cyclamen, 397
- Oxalate, rhubarb, composition, 257
- Panonychus ulmi*, apple, 459
- Peach, thinning, shade, photosynthesis, 465
  - water potential, testing, 47
- Pectinesterase activity, tangerine, creasing, 137
- Pests, apple, *Blastobasis decolorella*, 33
- Pistachio, composition, salinity, iron, 115
  - cultivars, Kalleghochi, 423
    - Ohadi, 423
  - flowering, synchrony, 107
  - growth, salinity, iron, 115
  - hybridization, artificial, 107
  - nutrition, salinity, iron, 115
  - pollen storage, 107
  - propagation, cuttings, 439
    - in vitro*, 423
- Photosynthesis, inhibition, thinning, peach, apple, 465
  - tomato, temperature, 405
- Plum, cultivars, Victoria, 193
  - fruit thinning, growth regulators, 193
  - propagation, cuttings, 153
  - growth regulator treatment, 153, 161
- Precocity, apple, micropropagation, 169
- Prosopis alba*, propagation, cuttings, 275
- Protected cultivation, onion, seed production, 251
- Pollen, storage, pistachio, 167
- Polyphenol oxidase activity, banana, 545

- Propagation, apple, carbon nutrition, 285
  - apple, cuttings, methods, 145
  - cherry, grafting, 311
    - species compatibility, 311
    - union composition, 311
  - cuttings, apple, 145, 161
    - Prosopis alba*, environment, 275
    - length, *Triplochiton* sp., 431
    - pistachio, cherry, 439
    - root initiation, *Triplochiton*, 431
  - in vitro*, apple, dwarf, 141
    - Centaurea junoniana*, 93
    - Cordyline*, 525
    - cyclamen, 397
    - gooseberry, 485
    - medium composition, 525
    - pistachio, 423
    - Quercus robur*, 99
    - raspberry, 493
    - rooting factors, 439
    - vegetative, narcissus, 531
  - Prunus*, propagation, species compatibility, 311
- Quercus robur*, propagation, *in vitro*, 99
- Raspberry, cultivars, Glen Clova, 319
  - diseases, virus, nematodes, 319
  - propagation, *in vitro*, 493
- Rhododendron, cultivars, P. J. M. Hybrids, 269
  - micropropagation, 269
- Rhubarb, composition, oxalate, malate, 257
  - cultivar collection, composition, 257
- Root pruning, affects seedling survival, 377
- Salinity, pistachio, growth, composition, 115
- Shade, thinning effects, peach, apple, 465
- Seedlings, survival, dessication, root pruning, 377
- Seed production, onion, protected cultivation, 251
- Strawberry, cultivars, Belrubi, 501
  - growth regulators, growth, yield, 501
- Selection, orange, Australia, 123
- Stomatal resistance, tomato, temperature, 405
- Storage, apple, CO<sub>2</sub> removal, 201
  - apple, short-term, 207
  - cold, apple, composition, quality, 291
- Stress, water, peach, 47
- Supplementary lighting, chrysanthemum, effects, 389
- Sward treatments, apple, composition, 37
- Tangerine, calcium content, creasing, 137
  - cultivars, Robinson, 137
  - disorders, creasing, 137
  - harvest date, creasing, 137
  - pectinesterase, creasing, 137
- Tetranychus urticae*, tomato, 517
- Temperature, apple, thinning, 21
  - tomato, physiological effects, 405
  - yield, quality, 359
- Thinning, fruit, plum, growth regulators, 193
- Tomato, antitranspirants, effects, 89
  - germination, growth regulators, 353
  - growth, seedlings, growth regulators, 353
  - leaf water status, antitranspirants, 89
  - nutrition, seed, yield, quality, 373
  - pests, red spider mite, 517
  - photosynthesis, temperature, 405
  - quality, temperature effects, 359
  - seed, quality, nutrition, 373
  - yield, nutrition, 373

- stomatal resistance, antitranspirants, 89
  - temperature, 405
- temperature, physiological effects, 405
- transpiration, temperature, 405
- yield, antitranspirants, 89
  - pest damage, 517
  - temperature affects, 359
- Transpiration, tomato, temperature, 405
- Triplochiton scleroxylon*, propagation, 431
- Virus, nematode-borne, raspberry, 319
- Water potential, peach, testing, 47
